The transformation! New engine. New look and new purpose in life. 'Betsy' the Diamond Rally vehicle was born!

Announcing the Famous Australian Kidney Kar Rally 2010—13th to 21st August 2010

The Kidney Kar Rally is an annual national fundraising event for Kidney Health Australia. This colorful event raises much needed funds for research, education, consumer participation and health service programmes as well as supporting the Kidney Kids Camps. **Julian Smith** (Managing Director Diamond Protection) and his legendary sister **Rachel Smith** (navigator) will compete in this famous rally. Starting at Swan Hill (on the Murray River Victoria) continuing through the wilderness desert country along the South Australian border. Facing sand dunes and rugged tracks, the Diamond Protection rally team will compete against 60+ Rally Kars. Our Diamond Special Project security teams are in position now to *'take out a few competitors'*. Onto the Flinders Ranges and further north connecting to the famous Strzelecki Track and onto Innaminca, an isolated oasis in the Moomba gas and oil fields. From there we're off to Queensland, travelling through Charleville finishing at the New South Wales border of Glen Innes. Last years Rally raised over \$500,000!
